Title: SPRAY CONTROL ANTI-BARK COLLAR

Abstract: An apparatus for controlling the barking of a dog through application of a spray deterrent, or spray control bark collar (10). The spray control bark collar (10) administers a dose of a pressurized substance in response to the barking of the dog. The spray control bark collar (10) detects the barking of the dog through the measuring of vibrations (100) produced by the dog. In addition, the spray control bark collar (10) delivers successively larger doses of the spray deterrent to the dog to deter the dog from further barking should the dog fail to respond to previous deterrent attempts. Finally, the spray control bark collar (10) monitors the usage of the spray deterrents to gauge (400) the amount of the deterrent substance remaining in the deterrent substance reservoir (112).
# INTERNATIONAL SEARCH REPORT

## A. CLASSIFICATION OF SUBJECT MATTER
- IPC(7) : A01K 15/02
- US CL : 119/718

According to International Patent Classification (IPC) or to both national classification and IPC.

## B. FIELDS SEARCHED
- Minimum documentation searched (classification system followed by classification symbols)
  - U.S. : 119/718, 719, 720, 858, 860

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched.

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used).

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Further documents are listed in the continuation of Box C. See patent family annex.

Special categories of cited documents:
- "A" document defining the general state of the art which is not considered to be of particular relevance.
- "E" earlier application or patent published on or after the international filing date.
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified).
- "O" document referring to an oral disclosure, use, exhibition or other means.
- "P" document published prior to the international filing date but later than the priority date claimed.

"I" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention.

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone.

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family.

Date of the actual completion of the international search: 09 July 2003 (09.07.2003)

Date of mailing of the international search report: 04 MAR 2005

Form PCT/ISA/210 (second sheet) (July 1998)
Box I Observations where certain claims were found unsearchable (Continuation of Item 1 of first sheet)

This international report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claim Nos.:
   because they relate to subject matter not required to be searched by this Authority, namely:

2. ☐ Claim Nos.:
   because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. ☐ Claim Nos.:
   because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.

2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.

3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:

4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest ☐ The additional search fees were accompanied by the applicant's protest.
☐ No protest accompanied the payment of additional search fees.
