The claimed design relates to a medical proximity detection token. The token includes environmental features depicted in the broken lines on the drawings. The design is claimed to be novel and non-obvious, and is considered to be copyrightable under the law. The token is used to detect the presence of personnel in close proximity to medical devices or critical areas, ensuring safety and compliance with regulatory requirements.

**Claim**

The ornamental design for a medical proximity detection token, as shown and described.

**Description**

Fig. 1 is a perspective view of the top of a medical proximity detection token showing my/our new design. Fig. 2 is a perspective view of the bottom thereof. Fig. 3 is a front elevation view thereof. Fig. 4 is a rear elevation view thereof. Fig. 5 is a side elevation view thereof. Fig. 6 is a top plan view thereof; and, Fig. 7 is a bottom plan view thereof. The broken lines depict environmental features of the medical proximity detection token, and form no part of the claimed design.
