(54) Title: A SOLAR PANEL SUPPORT APPARATUS

Fig. 1

(57) Abstract: A solar panel support apparatus (10) having first and second support stations (12,14) arranged spaced apart in an axial direction of a solar panel (16) or of an array of solar panels, each said support station being adapted to support said solar panel or array at respective first and second pivot points (20,22), said first and second pivot points being spaced apart in a direction transverse to said axial direction and each of said first and second pivot points cooperating with respective first and second guide members (24,26) of the associated support station, at least one of said guide members permitting movement of the respective pivot point with at least a vertical component and a drive (28) adapted to displace at least one of said pivot points and preferably at least one pivot point at each of said support stations.
