(54) Title: HEARING AID COMPRISING SOUND TRACKING MEANS

(57) Abstract: Sound reproduction system, for example a hearing aid system, comprising: - a direction dependent sound detection system (1), comprising a number of sound detectors (2); - at least one sound generator (10) to reproduce sound, or part thereof, detected by the sound detection system (1); and - a sensitivity direction modifier (20), configured to modify a main sensitivity direction of the sound detection system (1) between at least a first and a second sensitivity direction. The invention also provides a method to reproduce sound, for example using a sound reproduction system, as well as a portable hearing aid system.

A. CLASSIFICATION OF SUBJECT MATTER

INV. H04R25/00
ADD. G02C1/00

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
H04S G02C

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data

C. DOCUMENTS CONSIDERED TO BE RELEVANT

* Special categories of cited documents :

A document defining the general state of the art which is not considered to be of particular relevance

E earlier document but published on or after the international filing date

L document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

O document referring to an oral disclosure, use, exhibition or other means

P document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
