(54) **Title:** STYLUS-SUBSTRATE SYSTEM FOR DIRECT IMAGING, DRAWING, AND RECORDING

PRE-COLORED INTRINSIC IMAGING PAPERS

STANDARD STARTING COLORS

FLUCRESCNT STARTING COLORS

(57) **Abstract:** Stylus-substrate system components include an optical transitioning or color changing substrate and a stylus device/mechanism for inducing the optical transition or color change in the substrate. The optical transitioning or color change substrate possess all of the chemical components necessary to generate a single color or multiple color image, written matter, graphics, markings or recorded information. The stylus device/mechanism possesses the physical, electrical, and/or mechanical means for inducing the single or multi-colored change in the substrate.

* Special categories of cited documents

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance, the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance, the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
