The present disclosure described methods and systems for multimedia tactile augmentation. At least one method includes identifying media content loaded on a first computer, locating instructions stored on a second computer (said instructions corresponding to the content), initiating playback of the content, and synchronizing the instructions with the content. Said method further includes parsing and converting the instructions into one or more electrical signals, driving one or more haptic feedback devices with the electrical signals in synchronization with the playback of the content, and presenting the content to the user. The haptic feedback devices provide physical stimulation to a user accessing the content.
A. CLASSIFICATION OF SUBJECT MATTER
IPC(8) - G08B 6/00 (2014.01)
CPC - G08B 6/00 (2014.09)

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED
Minimum documentation searched (classification system followed by classification symbols)
IPC(8) - G08B 6/00; A61H 1/00 (2014.01)
USPC - 600/38; 601/46; 604/346, 347; 725/141

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched CPC - G08B 6/00; A61H 19/00; A61F 5/41; B00B1/00 (2014.09) (keyword delimited)

</table>

* Special categories of cited documents:
"A" document defining the general state of the art which is not considered to be of particular relevance
"E" earlier application or patent but published on or after the international filing date
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
"O" document referring to an oral disclosure, use, exhibition or other means
"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"&" document member of the same patent family
