(54) Title: COMPUTER DISPLAY ACCESSORY

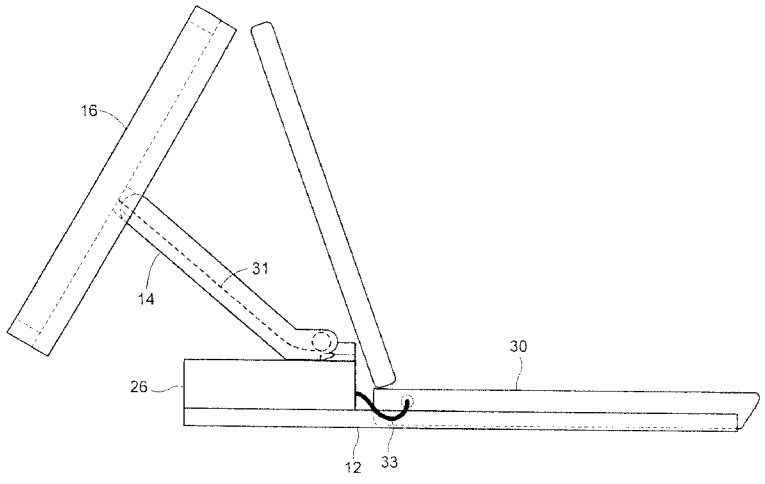

FIG. 6

(57) Abstract: The disclosed computer accessory has a separate display that is connected to a computer through an interface. A base part is used to fit the accessory to the computer, and a swing arm connects the base part and the accessory display. For easy transport, the disclosed accessory is arranged so that the accessory display can be stored flat against the computer. For use. the swing arm enables the accessory display to be folded out into an operational position where it can be easily seen by others.

A. CLASSIFICATION OF SUBJECT MATTER

G06F 1/16(2006.01)i, G06F 1/00(2006.01)i

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 8 : G06F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Korean Utility models and applications for Utility models since 1975

Japanese Utility models and application for Utility models since 1975

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

eKIPASS(KIPO internal) "dual" "display"

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents,such combination being obvious to a person skilled in the art

"&" document member of the same patent family
