(54) Title: SYSTEM AND METHOD FOR RECEIVING A WIRELESS STATUS SIGNAL IN A VEHICLE FROM A REMOTE ELECTRONIC SYSTEM

(57) Abstract: A wireless control system for wireless control of a remote electronic system comprises a trainable transmitter circuit, a receiver circuit, and a control circuit. The trainable transmitter circuit is configured to transmit a wireless control signal having control data which will control the remote electronic system. The receiver circuit is configured to receive a wireless status signal including status data for the remote electronic system sent in response to the wireless control signal. The control circuit is coupled to the trainable transmitter circuit and the receiver circuit and configured to transmit the wireless control signal through the trainable transmitter circuit and to receive the wireless status signal through the receiver circuit.

° Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *Z* document member of the same patent family
