## [57] CLAIM

[11]

[45]

The ornamental design for a bezel for set-top terminal, as shown and described.

## DESCRIPTION

FIG. 1 is a perspective view of the front top and right side of the bezel for set-top terminal showing our new design the set-top terminal being shown in broken lines for illustrative purposes only and forms no part of the claimed design;

FIG. 2 is a front view thereof the rear is unornamented and open so as to allow the bezel to be mounted on the front panel of a set-top terminal as shown in FIG. 1;

FIG. 3 is a left side view thereof;

FIG. 4 is a right side view thereof;

FIG. 5 is a top view thereof; and,

FIG. 6 is a bottom view thereof.

The bezel of the present invention is designed to be placed on the front panel of a set-top terminal. A set-top terminal is a box of electronic equipment used to connect a subscriber's television set with a cable television network. The front panel of a set-top terminal typically includes a display and user input devices, e.g., buttons, switches, etc., with which a user can control the functions of the set-top terminal.
