(54) **Floating platform**

(57) The invention relates to floating equipment designed for specific purposes, namely, to pontoons, floating docks, rafts and other floating structures.

The floating platform comprises at least two floating elements (2) linked by means of at least one fastening element (1), the two floating elements consisting of at least two lateral faces (3, 4) with at least one vertical projection (5) on one of them and at least one vertical projection on the other of the at least two lateral faces (6, 7) with at least one vertical cavity on one of them and

at least one vertical cavity (8) on the other, corresponding to the vertical projection (5); and comprises top and bottom faces forming together a hollow body (1) of the corresponding floating element (2) with at least one eye for placing the fastening element (1). Each vertical projection and each vertical cavity is provided on a portion of corresponding lateral face to form a supporting surface (13) on the projection and a supported surface (14) in the cavity.
