To all whom it may concern:

In the drawing:

Fig. 1 is a side elevational view of a locomotive body showing our design.
Fig. 2 is a perspective view of same, as seen from a point in front of and at the side of the body.
Fig. 3 is a front elevational view thereof.
The appearance of the side of the body opposite to that shown is substantially the same as that shown, and the rear end portion of the locomotive body design is conventional.

We claim:
The ornamental design for a locomotive body substantially as shown and described.
