(54) Title: METHODS AND APPARATUS FOR GATHERING INTELLIGENCE FROM ITEMIZED RECEIPTS

Fig. 1

(57) Abstract: An intelligence-gathering system operates on a network-connected server having at least one processor and at least one coupled data repository, with software executing on the at least one processor from a non-transitory medium. The software provides a first function obtaining data from itemized receipts, a second function obtaining related data from one or more merchant sites, and a third function matching data sets obtained from the itemized receipts to data sets obtained from the one or more merchant sites.

A. CLASSIFICATION OF SUBJECT MATTER*G06Q 20/12(2012.01)i, G06Q 30/02(2012.01)i*

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

G06Q 20/12; G06Q 30/00; G06F 17/60; G06Q 10/00; G06F 13/00

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Korean utility models and applications for utility models

Japanese utility models and applications for utility models

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
