To all whom it may concern:

Be it known that I, GEORGE L. WINTERS, a citizen of the United States, residing at
5 New York, in the county of New York and
State of New York, have invented certain
useful Improvements in Sanitary Garbage-Cans, of which the following is a specifi-
cation, reference being had therein to the ac-
companying drawing.

10 This invention relates to improvements in
sanitary garbage cans, one object of the in-
vvention being the provision of a can in
which the cover is provided with a disinf-
ector carrying means, so that the odor
from the garbage may be neutralized or en-
tirely obliterated.

A further object of this invention is the
provision of a device of this character which
is simple, durable and inexpensive in con-
struction, and thoroughly efficient and prac-
tical in use.

In the accompanying drawings—
Figure 1 is a vertical central sectional
view through a complete can, constructed ac-
cording to and embodying the present in-
vention.
Fig. 2 is a top plan view of the cover.
Fig. 3 is a bottom plan view thereof.

Referring to the drawings, the numeral 5
designates the can proper which may be
made of any shape or size, and 3 indicates
the cover.

This cover is provided with the two handles
7 by means of which the cover may be elev-
ated.

Carried by the cover are the tubes 8, here
shown in cruci-form formation, said tubes
being provided with openings 9 therethro-
ugh and with a small tube 10 having
a screw cap 11 for the reception of the dis-
infector.

The disinfectant is then placed at the top
of the can, and the openings 9 distribute the
same so as to neutralize the odor of garbage
from the can.

What I claim as new is:—
1. A cover for garbage cans, including a
main body having extending diagonally
thereon a cruci-form tubular member, said
member being provided with perforations
therein, and a filling tube in communica-
tion with said member.

2. A cover for garbage cans, including a
main body having extending diagonally
thereon a cruci-form tubular member, said
member being provided with perforations
therein, and a filling tube in communica-
tion with the cruci-form member at the cen-
ter thereof.

In testimony whereof I affix my signature.

GEORGE L. WINTERS.
