I-36061 Bassano del Grappa (Vicenza) (IT)

(54) **Support for radiating panels**

(57) Support for radiating panels, comprising a ground resting foot (11) having, in an upward region, means (17,22) for fixing to the radiating panel (16). The fixing means comprise a supporting base (17) for the radiating panel (16) and at least two mutually opposite levers (22) pivoted on the base (17) in a transverse position, so as to fit between the elements (18) of the panel. The force application region (23) of each lever (22) is associated with pusher means (26,27) rigidly coupled to the base (17) and the resistance application region (24) of each lever (22) is located outwardly so as to rest against a corresponding one of the elements (18) of the radiating panel (16).

Place of search	Date of completion of the search	Examiner	
THE HAGUE	2 February 1996	Van Gestel, H	
CATEGORY OF CITED DOCUMENTS		T : theory or principle underlying the invention	
X : particularly relevant if taken alone		E : earlier patent document, but published on, or after the filing date	
Y : particularly relevant if combined with another document of the same category		D : document cited in the application	
A : technological background		L : document cited for other reasons	
O : non-written disclosure		
P : intermediate document		& : member of the same patent family, corresponding document
