(54) Title: GASOLINE PUMP CLIP

(57) Abstract: A gasoline pump clip (30) holds the operating lever of the pump nozzle (20) in the "on" position. The nozzle is generally "C" shaped so that it can be used from either side or upside down. One portion of the "C" is inserted into the handle frame (26) to hold the operating lever (24) in its "on" position while the other portion of the "C" rests on top of the handle frame (26), thus holding the operating lever (24) to the top of the frame. The "C" shape also guards against rotation of the clip (30) from its working position and makes it compact enough to be secured to the inside of the vehicle's fill port cover (16).
