(54) Title: CONCENTRATING SOLAR COLLECTOR WITH SHIELDING MIRRORS

**FIG. 2**

(57) Abstract: One aspect of the invention relates to an arrangement for use in a concentrating solar collector that involves a solar receiver that is covered by a shielding mirror. The shielding mirror is attached with and positioned over the solar receiver to help deflect incident light away from the underlying solar receiver. In various embodiments, the shielding mirror is arranged to direct the light to a photovoltaic cell on another solar receiver. Another aspect of the invention pertains to a concentrating solar collector that utilizes the above arrangement.
