(54) Title: WAGERING GAME SYSTEM AND CORRESPONDING METHOD OF PLAYING A WAGERING GAME

(57) Abstract: The present invention relates to game systems and corresponding methods and in particular to wagering games that can be played using wireless communications devices. The goal of the invention is to make the game system simpler. The wagering game system includes a wireless communications operator, a game processor connected to a method implementation block that contains a random choice generator and a system of predetermined criteria to determine the game result. To play the game its participants use wireless communications devices, but the communications operator makes an extra-tariffication system and accounts system. The game processor includes also an authorisation block and a transaction fixation block that in its turn includes informative accounts of each player. The game processor includes also a feedback block that is connected to the game operator and a wireless communications device.
