(54) Title: SYSTEM AND METHOD FOR MONITORING MOBILE UNITS IN A WIRELESS NETWORK

(57) Abstract: A wireless networking system includes a network appliance and at least one mobile device. The mobile device comprises an application module, a discriminating application programming interface (API) that is executable within the context of the application and configured to receive data related to execution of the application and to determine whether the data is of a type that is to be monitored, and a monitoring API that is executable within the context of the application and configured to extract the data if the discriminating API determines the data is of a type that is to be monitored. The mobile device further comprises a wireless agent configured to extract and transmit the monitored data to the network appliance.

# INTERNATIONAL SEARCH REPORT

International application No  
PCT/US2005/043372

**A. CLASSIFICATION OF SUBJECT MATTER**  
INV. H04L29/08

According to International Patent Classification (IPC) or to both national classification and IPC

**B. FIELDS SEARCHED**

Minimum documentation searched (classification system followed by classification symbols)  
H04L

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal

**C. DOCUMENTS CONSIDERED TO BE RELEVANT**

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	WO 2004/059507 A (ELECTRONIC DATA SYST CORP [US]) 15 July 2004 (2004-07-15) paragraphs [0008] - [0015] abstract -----	1-20
A	WO 03/090476 A (WREN TECHNOLOGY GROUP) 30 October 2003 (2003-10-30) abstract paragraphs [0031] - [0042] -----	1-20

Further documents are listed in the continuation of Box C.

See patent family annex.

\* Special categories of cited documents :

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \* & \* document member of the same patent family

Date of the actual completion of the international search
