Declarations under Rule 4.17:

- as to applicant's entitlement to apply for and be granted a patent (Rule 4.17(ii))
- as to the applicant's entitlement to claim the priority of the earlier application (Rule 4.17(iii))

(54) Title: IMMERSIVE MEDIA METRICS FOR DISPLAY INFORMATION

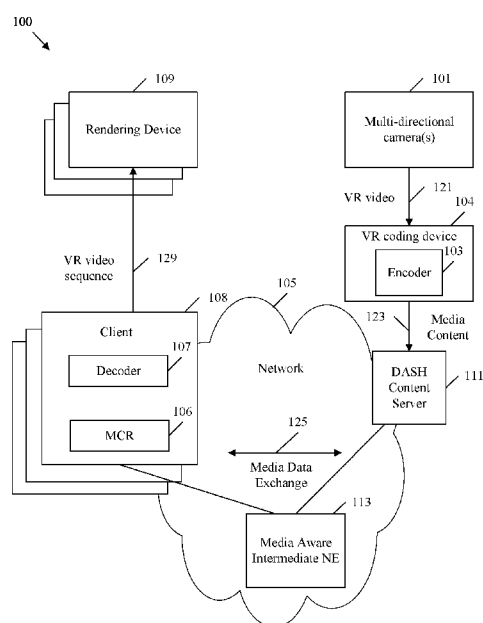

FIG. 1

(57) Abstract: A mechanism implemented in a Dynamic Adaptive Streaming over Hypertext Transfer Protocol (HTTP) (DASH) network is disclosed. The mechanism includes receiving a DASH Media Presentation Description (MPD) describing media content including a virtual reality (VR) video sequence. The media content is obtained based on the MPD. The media content is forwarded to a plurality of rendering devices for rendering. A display information set metric is determined that includes display information of the VR video sequence as rendered by the rendering devices. The display information set metric is transmitted toward a provider server.

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
