(54) Title: PLAYER ACTION INCENTIVE ARRANGEMENT FOR GAMING SYSTEMS

(57) Abstract: A processing device measures the time it takes for a player to take some action in a game and bases the award or result in the game for the player at least in part on that measured time. A player receives a more desirable result or outcome for a particular game play in response to a shorter player action time and/or receives a less desirable result or outcome for a particular game play in response to a longer player action time. Providing more desirable results for shorter player action times or less desirable results for longer player action times provides players an incentive that influences them to take the appropriate player actions more quickly.

Published:
- with international search report
- before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments

(88) Date of publication of the international search report: 12 October 2006

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
INTERNATIONAL SEARCH REPORT

A. CLASSIFICATION OF SUBJECT MATTER
IPC: A63F 9/24 (2006.01)
USPC: 463/16
According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED
Minimum documentation searched (classification system followed by classification symbols)
U.S.: 463/16

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
East
