UNITED STATES PATENT OFFICE.

GEORGE A. CHAMBERLAIN, OF GREENE, NEW YORK.

DESIGN FOR A CHECK-HOOK.

SPECIFICATION forming part of Design No. 27,387, dated July 20, 1897.
Application filed April 24, 1897. Serial No. 683,613. Term of patent 7 years.

To all whom it may concern:

Be it known that I, GEORGE A. CHAMBERLAIN, a citizen of the United States, residing at Greene, in the county of Chenango and State of New York, have invented and produced a new and original Design for Check-Hooks; and I do hereby declare the following to be a full, clear, and exact description of the same, reference being had to the accompanying drawings, forming a part thereof.

My invention relates to a design for a check-rein-hook; and it has for its object to provide a design of this character that shall be both useful and ornamental.

My invention relates to the entire configuration of the check-rein-hook.

It relates particularly to the design for a check-rein-hook as illustrated in the accompanying drawings, in which—

Figure 1 is a perspective view of a check-rein-hook embodying my design. Fig. 2 is a side elevation.

The leading features of my design appear in the following description.

1 represents the plane base-plate; 2, a forwardly-projecting obtuse-angled arm; 3, a rearwardly-and upwardly-projecting obtuse-angled arm; 4, a rearwardly-extending horizontal arm, terminating in a curved hook 5, provided with an enlarged knob 6.

7 represents a semicircular transverse rib arranged at the forward junction of the plate 1 and arm 2. 8 represents a rectangular eye extending laterally, forwardly, and upwardly from said rib 7.

Having thus fully described my invention, what I claim as new and useful, and desire to secure by Letters Patent of the United States, is—

The design for a check-rein-hook, substantially as herein shown and described.

In testimony whereof I affix my signature in presence of two witnesses.

GEORGE A. CHAMBERLAIN.

Witnesses:

ERASTUS S. WALKER,
CHARLES N. PIXLEY.
