**United States Patent Office.**

ALONZO FRENCH, OF PHILADELPHIA, PENNSYLVANIA.  

*Design No. 3,243, dated November 17, 1868.*

**DESIGN FOR A FRUIT-JAR.**

The Schedule referred to in these Letters Patent and making part of the same.

To all whom it may concern:

Be it known that I, ALONZO FRENCH, of the city of Philadelphia, in the county of Philadelphia, and State of Pennsylvania, have originated and designed a new Form or Pattern for a Fruit-Jar, to be made of glass or other ware, of which the following is a full description, reference being had to the accompanying drawing, making a part of this specification.

The general form of the jar A is square, with the corners rounded at a a a, and in each of the four sides is an oval indentation, in form as at e e e e, giving the form of a rib to the intervening spaces b b, which are even with the corners a a, the neck, f f, tapering very gradually, so that the mouth of the jar may be nearly as large as the body of the jar. The bottom may also be rounded at the edge or corners.

The advantages to be gained by jars of this design are their convenience for packing, and the additional strength given to the sides, by having two concave indentations, with a rib between, in each of the four sides.

What I claim as my invention, and desire to secure by Letters Patent, is—

A square packing fruit-jar, with two oval indentations in each side, in form and design as herein set forth.

ALONZO FRENCH.
