(54) Title: Fastening device for batteries, especially batteries for vehicles
(56) Cited documents: ---
(57) Abstract:

The invention relates to a fastening device (2) for at least one battery (1a,b), primarily for fastening of two or more batteries (1a,b) on a heavy commercial vehicle, such as in a truck or in a bus, comprising a battery box with a base plate (6) and at least one overlaying yoke (3). The invention is achieved by that a lower fastening element (4) with T-formed ends (4a,b) is arranged at the lower part of the batteries (1a,b), preferable located between two or more batteries (1a,b), and that the lower fastening element (4) is releasable fixed to the base plate (6) of the battery box.
