(54) Title: COMPOSITIONS AND METHODS FOR TREATING WOUNDS

Fig. 5C

(57) Abstract: Methods and compositions for treating wounds are described. The compositions include core active ingredients derived from the genera of: Calendula, Achillea Millefolium, Syzygium Aromaticum and Helichrysum. The methods include mixing the core active ingredients, preferably with other secondary active ingredients, adjuvants or excipients, to form the composition and administering the composition by topically applying an effective amount of the composition onto a wound or incision of a patient.

A. CLASSIFICATION OF SUBJECT MATTER
 IPC(8) - A61K 36/28; A61K 35/655 (2017.01)
 CPC - A61K 36/28; A61K 36/61; A61K 35/644; A61K 9/0014; A61K 9/06

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

See Search History Document

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

See Search History Document

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

See Search History Document

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
