(54) Title: METHOD AND DEVICE FOR PLAYING A GAME

(57) Abstract: The present invention includes a gaming device comprising a game apparatus being adapted to allow a player to play a game and a jumbled ball display device. The jumbled ball display device includes a plurality of display balls, at least one container adapted to hold the display balls, and at least one agitator adapted to agitate the display balls inside of the container. The container preferably includes at least one portion that is at least partially transparent, which allows the player to view the balls in the container. The jumbled ball display device preferably does not affect the outcome of the game played on the game apparatus. The gaming device further includes a prize display in communication with the game apparatus. The prize display is preferably adapted to select a prize ball to convey the outcome of the game and display the selected prize ball. The gaming device also preferably includes a media dispenser in communication with the game apparatus. The media dispenser is preferably configured to dispense media to the player.
