CARRYING CASE FOR TRANSPARENCIES OR SIMILAR ARTICLE

William R. Furniss, Glendale, Wis., assignor to Milprint Inc., Milwaukee, Wis., a corporation of Delaware

Filed Aug. 16, 1967, Ser. No. 8,291

Term of patent 14 years

(CI. D87—2)

FIG. 1 is a front perspective view of a carrying case for transparencies or similar article incorporating my new handle design.

FIG. 2 is a rear perspective view of the carrying case of FIG. 1 in a partly open condition, disclosing the side and end opposite from the side and end shown in FIG. 1.

FIG. 3 is a top plan view of the carrying case of FIG. 1;

FIG. 4 is a side elevational view of the carrying case of FIG. 2;

FIG. 5 is an enlarged cross-sectional view of the grip portion of the handle taken along the plane of line 5—5 in FIG. 3;

FIG. 6 is an enlarged cross-sectional view of the grip portion of the handle taken along the plane of line 6—6 in FIG. 3; and

FIG. 7 is an enlarged cross-sectional view of the grip portion of the handle taken along the plane of line 7—7 in FIG. 3.

The dominant features of my design reside in the exterior handle portions shown in full line in the drawings, a conventional base member being shown in broken lines.

FIGS. 5, 6 and 7 show sectional views of the upper one-half of the grip portion of the handle as illustrated in FIG. 3, and the other (or lower) half is of the same configuration so that the two halves are symmetrical.

I claim:
The ornamental design for a carrying case for transparencies or similar article, as shown and described.
