(54) Title: SYSTEMS AND METHODS FOR DISCOVERING FEATURES IN A COMMUNICATION DEVICE

(57) Abstract: Systems and methods for discovering features of a communication device. The features of a communications device are tracked or monitored. Features that are unused or undiscovered are identified. The undiscovered features are then included as ticker items in an interactive ticker. When a ticker item that corresponds to an undiscovered feature is selected, the user is presented with information or a tutorial that instructs the user about the feature or how to use the feature. The undiscovered features included in the ticker can change based on how the usage of the device's features changes.
