(60) Provisional application No. 60/585,392, filed on Jul.
3, 2004.

With Technology changing everyday, the universal comfort bedpan gives the patient the privacy and less suffering with a push of a button the patent no longer needs the old standard bedpan and the pain of being lifted. This way gives the patent the privacy in there own room to use bedpan. This bedpan is used by sensors to allow the person to be washed and dried in the hospital without the assist of hospital personal, by a push of a button. The universal bedpan is the thinking of the future.

FIG 6 F.

TOOTH PASTE TOOTH BRUSH ALL IN ONE**BACKGROUND**

[0001] Applicant found three patents with similar classifications on web search threw patent office.

[0002] U.S. Pat. No. 6,931,684 pertains to a hole in mattress and frame on track.

[0003] U.S. Pat. No. 6,647,571 this pertains to a slide bedpan under bed frame.

[0004] U.S. Pat. No. 4,122,565 is mattress pad protective cover for mattress pad.

[0005] I have gone one step more in this process of this bed pan.

[0006] This bed pan was put on a track such as electric train with forward and reverse that was incorporate into a cleaning and drying system to clean a patient bottom. When not in use the bedpan is moved and the protective mattress pad and cover is under the patients bottom.

[0007] When the bed pan is used the bed pan is moved under the patients bottom and the mattress pad is moved.

[0008] In reverse direction.

[0009] When the bed pan is activated electrically, manual etc or sensors.

[0010] A gust of warm water is sprayed onto a persons behind.

[0011] Then a dryer is set on timer to allow a person behind to be dried.

[0012] When finished the bedpan is activated and moved forward to the end of the bed.

[0013] There a spring is released to cover the waste, and a light will allow the nurse to empty when needed.

[0014] This is the answer to the hospital needs of under management of staff personal and lawsuits of nurses with bad backs. And abusing of patent needs. This is the bed pan of the future.

SPECIFICATION VIEWS

[0015] The universal comfort bedpan was made with a old train track with forward and reverse motion with bed pan on top track with opening in mattress pad and spring holding lid the bottom half of track has the Opening in mattress pad and spring holding the bottom half of the track has the mattress pad. View I

[0016] The next view shows the bed pan engaged in forward motion and the protective mattress pad on the bottom of the track view II

[0017] Last view is the bed pan has been used and the lid has come down to cover the bedpan top and the spring mattress pad has filled the hole View III

[0018] Next page shows a waterhole inside a protective unite with sensors the water is forced inside a tiny hole in bedpan by small fan. View VI

[0019] Following the timed sensors is a heating element that is fan driven that sends heat to the bedpan so the moisture is dried. View V

[0020] Last I'm Showing the lip where bed pan slides into effect for waste removal light can be attached to this unit making this the versatile unit on the market View VI

1. I Dawn Eileen Hughes claim all rights to the universal comfort bedpan and all prior art.

My claim is for incorporation of a cleaning and drying and the way the bedpan is used with other inventions mentioned earlier at beginning of my patent.

I Dawn Eileen Hughes claim my full patent rights to the function of the universal comfort bedpan.
