(54) Title: SYSTEM AND METHOD FOR MAPPING RESULTS FROM SPORTING EVENTS TO GAME INPUTS

(57) Abstract: A method of mapping sporting event results to inputs for a game is provided. One or more event results of a particular sporting event having a particular number of participants are received, and a set of rules is selected from a plurality of sets of rules based on the particular number of participants in the particular sporting event. For each of a plurality of bets, one or more inputs for a game are determined by applying the selected set of rules to the received one or more event results of the particular sporting event. The result of the game is then determined for each of the plurality of bets based at least on the one or more determined inputs for that bet.
