(54) **An arrangement for mounting a radiator on a substrate**

(57) An arrangement for mounting a radiator (1) with a vertical, downwardly open accommodation space (6), includes a base section (8), an upright (10), two anchorages (15, 16), a locking device and spring means (21). The base section (8) is fixable in a substrate (7). The upright (10) extends upwards from the base section (8) and into the accommodation space (6). The one anchorage (15) is supported by the upright (10) and is designed for cooperation with a first portion of the radiator (1). The second anchorage (16) is intended to cooperate with a second portion of the radiator (1), located above the first portion. The second anchorage (16) has an open position and a locking position. The locking device locks the second anchorage (16) in the locking position and has an operating device (23) outside the accommodation space (6). The spring means (21) imparts a pre-tensioning to the second anchorage (16) in a direction towards the locking position.
