(54) Title: VOICE SEARCH-ENABLED MOBILE DEVICE

FIG. 1

(57) Abstract: Methods and devices for providing a user of a mobile communications device with mobile voice-mediated search capability. The methods and devices involve receiving an utterance from a user of the mobile device, the utterance including a search request; using the speech recognition functionality to recognize that the utterance includes a search request; as a result of recognizing that the utterance includes a search request, establishing a wireless data connection to a remote server; sending a representation of the search request to the remote server over the wireless data connection; receiving search results that are responsive to the search request; and presenting the search results on the mobile device.
