(54) Title: CONTEXTUAL SOCIALLY AWARE LOCAL SEARCH

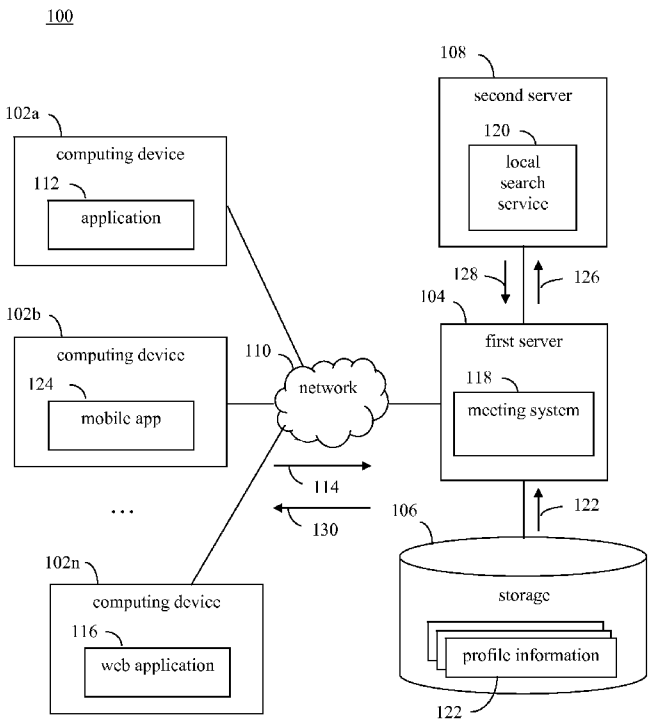

FIG. 1

(57) Abstract: Methods, systems, and computer program products are provided for determining a meeting location. A group of persons to meet is determined. A conjoined interest set is generated that is representative of the group of persons. Locations of persons in the group are determined to determine a plurality of locations. Local search results for the group of persons are received that are generated based on the conjoined interest set and the determined plurality of locations. The local search results include at least one potential meeting location. The local search results are enabled to be presented to at least one person of the group of persons.
