UNITED STATES PATENT OFFICE.

FILBERT L. WRIGHT, OF BRISTOL, CONNECTICUT.

IMPROVEMENT IN CURRY-COMBS.

Specification forming part of Letters Patent No. **152,542**, dated June 30, 1874; application filed April 7, 1874.

To all whom it may concern:

Be it known that I, FILBERT L. WRIGHT, of Bristol, Hartford county, State of Connecticut, have invented an Improvement in Curry-Combs, of which the following is a specification:

My invention consists in a curry-comb having a revolving plate, and also in a curry-comb having its teeth pressed from the ridge of a single corrugated plate.

Figure 1 in the accompanying drawing is a perspective view of my invention. Fig. 2 is a part longitudinal section of the same.

A is the corrugated plate of a single piece of metal, having its ends secured to the rod cross-pieces F F' by bending. The side frames B B' are riveted to the cross-pieces F F', the ends of the rods C C' are inserted in the handle D, while the opposite ends are bent to form a right angle, to allow the comb space in which it may revolve. Eyes are formed on

the outer ends of the rods C C', which are slipped over the journal d. The latter are secured to the side frames B B'. Any suitable catch or fastening device may be used to retain the comb in a fixed position. I have shown one form, which consists of a flat bent spring, E, which is secured to the handle, while its opposite curved end engages with the frame and holds it securely.

What I claim, and desire to secure by Letters Patent, is—

1. A curry-comb having a revolving comb-plate, as set forth.
2. A comb-plate formed of a single corrugated piece of metal, having teeth on its ridges, as and for the purposes set forth.

FILBERT L. WRIGHT. [L. S.]

Signed and sealed in presence of—

MILES L. PECK,
HENRY A. SEYMOUR.
