## (54) Title: CARTON WITH RECLOSABLE FITMENT

(57) Abstract: A carton includes a chamfered corner, and a dispenser defined in the chamfered corner. A fitment may be mounted to the chamfered corner of the carton, for use in dispensing contents from the interior of the carton by way of the dispenser. The fitment may comprise a base with a rearward receptacle that is in receipt of the chamfered corner of the carton. A passageway extends through the base, from the receptacle to a front opening of the passageway, and the contents from the interior of the carton may be dispensed outwardly through the front opening of the fitment. The fitment may include one, or more inwardly protruding mounting members that may engage behind one or more edges of the carton for restricting the fitment from being pulled off of the chamfered corner of the carton.
