(54) **Title:** SYSTEMS AND METHODS FOR SELECTING AN ALTERNATIVE COMPUTING INFRASTRUCTURE AND FACILITATING THE MIGRATION AND ADOPTION THERETO

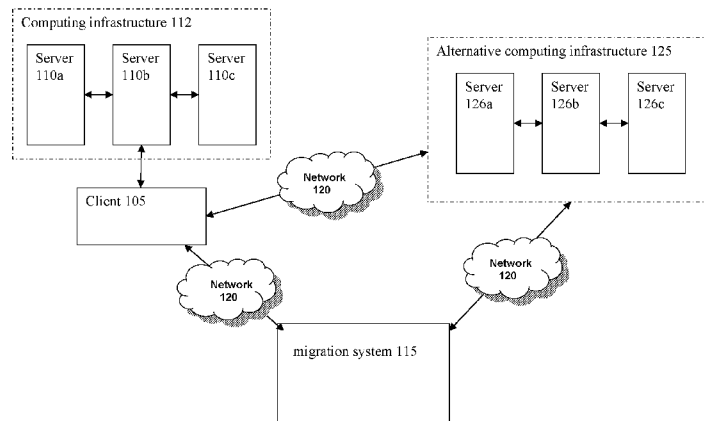

FIG. 1

(57) **Abstract:** The present disclosure is directed to, among other things, a method that includes accessing a first server in a first computing infrastructure to obtain data about a configuration of the first computing infrastructure and use of the first computing infrastructure. The method may also include analyzing, by a processor on a second server, the data from the first server. The method may also include selecting, based on the analysis of the data, a second computing infrastructure from a plurality of computing infrastructures to replace the first computing infrastructure. The method may also include generating a report with the analysis of the data and the selected second computing infrastructure. The present disclosure is directed to, among other things, a method that selecting, by a processor, user accounts on a first computing infrastructure to migrate to a second computing infrastructure; provisioning, by the processor, a parallel user account on the second computing infrastructure for each of the user accounts on the first computing infrastructure; and migrating, by the processor, information from the user accounts on the first computing infrastructure to the parallel user accounts.

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

G06F 15/16; G06F 12/02; G06F 9/455; G06F 15/177; G06F 9/50

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Korean utility models and applications for utility models
Japanese utility models and applications for utility models

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

eKOMPASS(KIPO internal) & Keywords: application migration, cloud-based infrastructure , configuration

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
