

UNITED STATES PATENT OFFICE

EMIL C. JÜRGENSEN, OF PORTLAND, OREGON.

IMPROVEMENT IN MEDICAL COMPOUNDS OR BITTERS.

Specification forming part of Letters Patent No. 147,009, dated February 3, 1874; application filed October 25, 1873.

To all whom it may concern:

Be it known that I, EMIL C. JÜRGENSEN, of Portland, in the county of Multnomah and State of Oregon, have invented a Stomach Bitters; and I do hereby declare that the following is a full and exact description of the same.

The nature of my invention consists in compounding certain materials, as hereinafter described; and to enable others skilled in the art to make and use my invention, I will proceed to describe its composition and manner of manufacturing.

I use two barrels, one as a flavoring-barrel and the other as a mixing-barrel. The compounds that I put in the flavoring-barrel are as follows: One and one-half ($1\frac{1}{2}$) pound cardamom-seed; one and one-half ($1\frac{1}{2}$) pound cinnamon-bark; one-quarter pound ($\frac{1}{4}$) nutmeg; three-quarters pound ($\frac{3}{4}$) cloves; three-quarters pound ($\frac{3}{4}$) white ginger; three-quarters pound ($\frac{3}{4}$) bitter-orange peel; three-quarters pound ($\frac{3}{4}$) lemon-peel; three-quarters pound ($\frac{3}{4}$) galanga; one-quarter pound ($\frac{1}{4}$) fennel-seed.

This is to be put into the barrel with forty (40) gallons of French cologne spirits, and let stand fourteen (14) days; then drawn off, leaving the sediment.

The compounds that I put into the mixing-barrel are as follows: Twenty (20) gallons of the product of the flavoring-barrel, and mix with fifteen (15) gallons of French cologne spirits reduced to fifteen (15°) degrees below proof; then add white-sugar sirup, (according to its strength,) so as to reduce to seventy-five (75°) degrees below proof, and add two (2) gallons sugar color. Then mix well and bottle, seal, and affix trade-mark and label.

What I claim as my invention, and desire to secure by Letters Patent, is—

A compound composed of the ingredients herein set forth, compounded substantially as described.

EMIL C. JÜRGENSEN.
