

UNITED STATES PATENT OFFICE.

A. M. DENNEN, OF FOLSOM CITY, CALIFORNIA.

IMPROVED LINIMENT FOR RHEUMATISM.

Specification forming part of Letters Patent No. **82,696**, dated October 6, 1868.

To all whom it may concern:

Be it known that I, A. M. DENNEN, of Folsom City, in the county of Sacramento and State of California, have invented a new and useful Improvement in Liniment for Rheumatism; and I do hereby declare that the following is a full, clear, and exact description thereof, which will enable others skilled in the art to make and use the same.

The object of this invention is to provide a medical compound which is an effective remedy in treating rheumatism by topical application.

It is composed of equal parts, by weight, of the following: Oil of wormwood, oil of cassia, oil of hemlock, oil of tansy, oil of lavender, oil of anise, oil of cloves, oil of origanum, oil

of tar, tar-balsam, gum-opii, and gum-myrrh, with enough alcohol to make the above ingredients into a fluid mixture or liniment.

This liniment is an excellent palliative for chronic rheumatism, and will be found to remove ordinary cases of acute rheumatism.

Having thus described my invention, I claim as new and desire to secure by Letters Patent—

The medical compound, substantially as herein described.

The above specification of my invention signed by me this 10th day of July, 1868.

A. M. DENNEN.
