(54) **Title:** FOOT PROPELLED VEHICLE

Figure 1

(57) **Abstract:** A foot propelled vehicle (1) comprises a front housing (5) in which a first rotatable sphere (10) is mounted by bearings (15, 16, 17) for rotation about a fixed transverse axis, and a rear housing (9) in which a second rotatable sphere (11) is mounted by bearings (18, 19, 20) for rotation about three orthogonal axes. The front housing is longitudinally spaced from and connected rigidly to the rear housing by means including an elongate connecting member (2). A seat (3) is provided by a depressed portion of the connecting member (2) between the front and rear housings and positioned so that a rider's feet can contact the ground to propel the vehicle. A handle (6) is mounted above the front housing (5) for the user to hold whilst riding the vehicle. Lateral stabilizers (12,13) may be provided, mounted on platforms (14) on either side of the vehicle.

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
