(54) **A hot sandwich dispenser**

(57) This dispenser comprises a metal cabinet (1) innerly forming a refrigerated chamber (2) with two vertical carousels (3, 4) on whose platforms (5, 6) sandwiches (bo, bi) are stored, upon each activation of the dispenser one of these sandwiches being pushed into an electric grill (11) wherein it is then warmed up before thereupon being finally pushed onto a receiver tray (15) being accessible from the outside, the dispenser being in a position to offer sandwiches (bo, bi) with different ingredients and of different sizes and/or types, the cabinet (1) for such a purpose comprising for each of its carousels (3, 4) a respective sensing device (21) that upon the starting of said carousels causes these latter to stop at a predetermined position to thereupon and once the user has acted on the dispenser cause the pertinent one to be again started in one or another direction depending on the selected sandwich (bo or bi), till in a given section of the carousel detecting a sandwich (bo or bi) on one of the platforms (5 or 6), and to thereupon cause the carousel (3 or 4) to be stopped again so as to thus have said sandwich shifted over up to the grill (11).
