54 **Roller mills.**

57 A roller mill for bruising, rolling or crushing cereals as an animal foodstuff comprises a support in which a plurality of metal rollers (3, 4, 5) are arranged in a downward succession of counter-rotatable operating pairs with the peripheries of each pair providing a nip therebetween. The nips of the rollers form a passage through which the cereals can pass to be progressively flattened. Means are provided to adjust the width of gap in each nip to determine the degree of flattening to be applied to cereals passed therebetween. At least one roller (3) is adapted to be driven.

DOCUMENTS CONSIDERED TO BE RELEVANT			
Category	Citation of document with indication, where appropriate, of relevant passages	Relevant to claim	CLASSIFICATION OF THE APPLICATION (Int. Cl. ³)
X	DE-C- 5 555 (L. NEMELKA) * Page 1 and figures * ---	1-5	B 02 C 4/06 B 02 C 4/38
X	DE-C- 2 336 (ERNE) * Pages 1,2; figures * -----	1-5	
			TECHNICAL FIELDS SEARCHED (Int. Cl. ³)
			B 02 C
The present search report has been drawn up for all claims			
Place of search		Date of completion of the search	Examiner
THE HAGUE		31-01-1985	VERDONCK J.
CATEGORY OF CITED DOCUMENTS			
X : particularly relevant if taken alone		T : theory or principle underlying the invention	
Y : particularly relevant if combined with another document of the same category		E : earlier patent document, but published on, or after the filing date	
A : technological background		D : document cited in the application	
O : non-written disclosure		L : document cited for other reasons	
P : intermediate document		& : member of the same patent family, corresponding document
