G. Smiths, H. Brown & Jos. A. Read of Philadelphia, Pa.
Assignors to J.G. Abbott & Archibus Laurence of the same place
Letters Patent No. 802. Dated June 17th. 1856.

The schedule referred to in these Letters Patent, and making part of the same.

To all whom it may concern:

Be it known that we Garretson Smiths, Henry Brown and Joseph A. Read, of Philadelphia City and County, and the State of Pennsylvania, have invented or produced a new and original Design for Cook Stoves designated as the "President". And we do hereby declare that the following is a full, clear and exact description of the said design; reference being had to the annexed drawings, making part of this specification, in which,

Figure 1, is a front elevation of the stove.

Figure 2, is a rear elevation.

Figure 3, is a side elevation.

Similar letters of reference denote the same part of both stove and design, wherever found.

The front plate A, bears the doors B, B', C, C', raised above the plate by a moulding a. Between the upper and lower doors is the inscription "President patented 1856", in raised capitals and numerals. The panels of doors B B', each bears an ornament in bass-relief, made up of foliage b, and bands c, arranged and configured as shown in the drawing. The panels of doors C C', are each ornamented in bas-relief, by figure d, surrounded by the wavy band e, upon which are the foliage f, and bands g; the several parts of these ornaments being arranged, and having the configuration set forth in figure 1.

The back plate D, bears the three panels E, E' and E'', raised above the plate by a moulding h. The panels E' and E'', are each ornamented in bas-relief by the combined foliage i, and band j.

Des 802

The panel F, bears an ornament in bas-relief, made up of figure K, wavy band L, foliage M, and bands N, similar to the ornaments on the panels C C'. Above the panels, plate D, bears this inscription in raised capitals "Abbott & Lawrence Philad^{a}". The precise configuration and arrangement of the ornaments on this plate are shown in figure 2.

The side plate H, bears the three panels G, I, J, the latter constituting the oven doors and the former cast with the plate.

Above the doors is the inscription "President", and below them "patented 1856", in raised capitals and numerals.

The panels I & J, bear ornaments in bas-relief made up of the figure O, wavy band P, foliage Q, and band R.

Panel G, bears an ornament made up of foliage S, and band T. The several ornaments above specified have the design, configuration and arrangement shown in fig 3.

We claim the design, configuration and arrangement of the several ornaments in bas-relief, as set forth, on the plates of the cook stove designated as the "President".

In testimony whereof we have hereunto signed our names before two subscribing witnesses.
