(54) Title: LOCALLY STORED CONTENT PREVIEWS IN AN ELECTRONIC PROGRAMMING GUIDE

(57) Abstract: An integrated DSS/WebTV receiver (12) is communicatively connected to an Internet service provider (24), a DSS service provider, and (optionally) a local broadcast station (28) to provide a display of DSS programs, Internet web sites, and local broadcast channels in a seamless fashion. The DSS/WebTV receiver (12) downloads graphic images, corresponding to DSS programs, from a DSS communication medium or the Internet into a local memory. The graphic images are periodically updated by the DSS service provider or Internet service provider (24). The DSS/WebTV receiver (12) generates a graphical user interface (GUI), displayed on a television screen (16), for facilitating a user's navigation through the DSS, Internet, and local broadcast data. The GUI includes a selectable DSS program listing that displays DSS programs that are currently being broadcast or that will be broadcasted in the future.
