A method and apparatus for processing a ConnectionOpenResponse message in a wireless communication system.

The method includes receiving (402) the ConnectionOpenResponse message and a ForwardTrafficChannelMAC.UATIReceived indication in the same packet and determining (404) if an UATIStatus field with the ForwardTrafficChannelMAC.UATIReceived indication is set to '0x2'.
For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
A. CLASSIFICATION OF SUBJECT MATTER
INV. H04Q7/38

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
H04Q H04B H04L

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data bank consulted during the international search (name of data base and, where practical, search terms used)
EPO-Internal

C. DOCUMENTS CONSIDERED TO BE RELEVANT

<table>

D. Further documents are listed in the continuation of Box C

E. *Special categories of cited documents

1. "A" document defining the general state of the art which is not considered to be of particular relevance
2. "E" earlier document but published on or after the international filing date
3. "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
4. "O" document referring to an oral disclosure, use, exhibition or other means
5. "P" document published prior to the international filing date but later than the priority date claimed

Date of the actual completion of the international search

30 March 2007
