(54) Title: VISITOR CONTROL AND TRACKING SYSTEM

(57) Abstract: A visitor control and tracking system for a venue (4) having various access points (6, 7) and multiple destination points (Z1-Z4) includes a monitoring system (120) that tracks location and movement of visitors to the venue (4). Prior to entering the venue (4), visitors first interact with one of a plurality of screening centers (40) which performs a security scan. A controller (130) operatively connected to the plurality of screening centers (40) determines a visitor associated metric for each of the plurality of destination points (Z1-Z4). Once the controller (130) determines the visitor associated metric, information is provided to the visitors that will help guide them about the venue (4). The information can be provided on a display (79) provided on each of the plurality of screening centers (40) and/or on displays (150 a-j) provided about the venue (4).
**INTERNATIONAL SEARCH REPORT**

**INTERNATIONAL APPLICATION**

- PCT/US0638746

**A. CLASSIFICATION OF SUBJECT MATTER**

- IPC(8) - G08B 7/00 (2007 01)
- USPC - 340/691 5

According to International Patent Classification (IPC) or to both national classification and IPC.

**B. FIELDS SEARCHED**

- Minimum documentation searched (classification system followed by classification symbols)
  - IPC(8) - G08B 7/00 (2007 01)
  - USPC - 340/691 5

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched.

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

- MicroPatent

**C. DOCUMENTS CONSIDERED TO BE RELEVANT**

**D. Further documents are listed in the continuation of Box C**

- Special categories of cited documents
  - "A" document defining the general state of the art which is not considered to be of particular relevance
  - "E" earlier application or patent but published on or after the international filing date
  - "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
  - "O" document referring to an oral disclosure, use, exhibition or other means
  - "P" document published pior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance, the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance, the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family

**Date of the actual completion of the international search** 24 March 2007

**Date of mailing of the international search report** 26 OCT 2007
