(54) An alpine seat.

(57) The invention relates to an alpine seat comprising a cloth (7) or the like serving as a seat, the lower and upper ends of which cloth are suspended to hang on downhill skis (6) or the like pushed into the snow. The essential thing of the invention is that the upper edge of the seat cloth (7) has a hem (5) along its whole breadth, through which hem a ski stick (8) can be pushed, and that carrying means (4) fastened to the vicinity of the upper end of the cloth and to be suspended on the tips of the skis (6) pass the ends of the hem (5) in such a way that the stick (8) can be pushed into an opening or a loop formed therein, the extension strain of the carrying means (4) being distributed in the seat through the stick (8) to the upper edge of the hem (5) along the whole breadth of the seat, when the seat is loaded.

CATEGORY OF CITED DOCUMENTS

X: particularly relevant if taken alone
Y: particularly relevant if combined with another document of the same catagory
A: technological background
O: non-written disclosure
P: intermediate document
T: theory or principle underlying the invention

E: earlier patent document, but published on, or after the filing date
D: document cited in the application
L: document cited for other reasons

&: member of the same patent family, corresponding document
