(54) Title: VARIABLE MAGNETIC MODULAR SYSTEM AND ITS COMPONENTS

(57) Abstract: The invention relates to a variable magnetic modular system characterized in that it consists of at least two parts, wherein each part consists of at least two struts and at least one separating element between these struts and at least one strut in each part is provided with at least one element of the magnetic joint to establish a rotary magnetic joint between the associated parts. The parts of variable magnetic modular system can preferably consist of a monolithic body wherein the elements of the magnetic joint are integrated in the body of the part.

A. CLASSIFICATION OF SUBJECT MATTER
 INV. E04B2/74 E04H1/12
 ADD.

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

E04B E04H

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

EPO-Internal, WPI Data

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
