(54) Title: PROVIDING ACTIONABLE CONTENT TO A COMPUTING DEVICE BASED ON USER ACTIONS

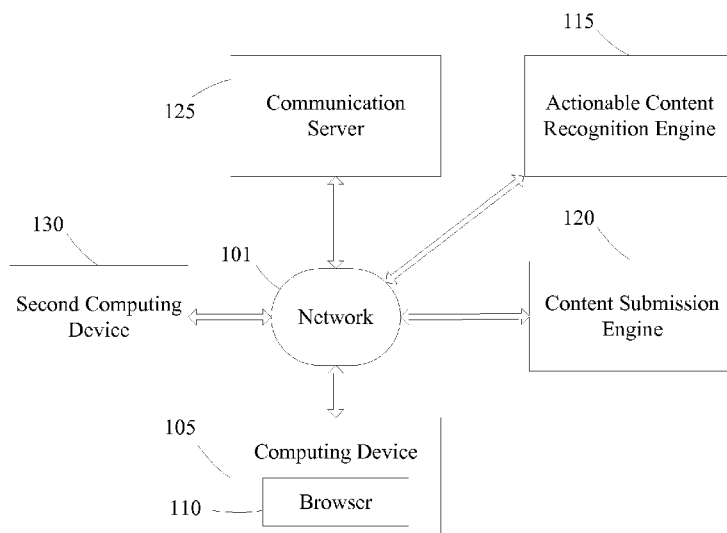

FIG. 1

(57) Abstract: Methods and apparatus related to identifying content accessed on a computing device that is likely actionable on another computing device. Some implementations are directed to methods and apparatus for identifying a computing device of a user, identifying content accessed on another computing device by the user, determining content that is actionable on the computing device, determining a confidence level that the actionable content is of interest to the user, and providing the actionable content for use on the computing device if the confidence level satisfies a threshold. The confidence level may be based on an indication of time passage between the user accessing the content on the other computing device and the identified use of the computing device.
