UNITED STATES PATENT OFFICE.

ADOLPH SCHLINGMAN, OF WEST ALEXANDRIA, OHIO.

IMPROVEMENT IN WASH-TUBS.

Specification forming part of Letters Patent No. **176,554**, dated April 25, 1876; application filed March 9, 1876.

To all whom it may concern:

Be it known that I, ADOLPH SCHLINGMAN, of West Alexandria, Preble county, Ohio, have invented a new and useful Tub for Washing-Machines, &c., of which the following is a specification:

My invention consists of a tub, which is elevated a suitable distance above the ground by means of legs formed by a prolongation of three adjacent staves, of which the tub is composed.

The accompanying drawing is a perspective view of a washing-machine tub embodying my invention.

A, B, C, and D are four staves, so prolonged downward as to constitute legs, which elevate the tub the desired distance above the ground. E are contiguous staves, also prolonged downward, for the double purpose of strength and appearance.

I claim as new and of my invention—

1. A wash-tub, substantially such as described, having three adjacent staves near each corner continued or lengthened to form legs to support the tub, and braces for said legs, as set forth.

2. The tub shown, having staves A B C D, of about double the usual length, to form legs for the tub, the staves E E being also lengthened and constructed as shown, to form braces for said legs, for the purpose described.

In testimony of which invention I hereunto set my hand.

ADOLPH SCHLINGMAN.
