

UNITED STATES PATENT OFFICE.

EDWIN W. OBER, OF ALBANY, NEW YORK.

IMPROVEMENT IN MEDICAL COMPOUNDS OR LINIMENTS.

Specification forming part of Letters Patent No. **146,199**, dated January 6, 1874; application filed December 20, 1873.

To all whom it may concern:

Be it known that I, EDWIN W. OBER, of the city of Albany, county of Albany and State of New York, have invented a certain Compound to be used externally for the relief of pain in cases of rheumatism, neuralgia, headache, toothache, burns, bruises, strains, &c., of which the following is a specification:

The nature of the invention consists in compounding, in the following proportion, one gallon linseed-oil, two ounces oil of cedar, two ounces oil of sassafras, two ounces oil of origanum, two ounces oil of hemlock, half ounce oil of spike, one ounce oil of wormwood, one ounce ether, four ounces gum-camphor, and four ounces ammonia.

To prepare the liniment, pulverize the camphor and ammonia; add them to the linseed-oil and shake for ten or fifteen minutes; then add the other ingredients; shake until well mixed, after which let it stand until thoroughly settled, when it will be ready for use.

I claim as my invention—

A compound of the ingredients above mentioned, substantially in the proportions and for the purpose set forth.

EDWIN W. OBER.
