Thomas Corbank
Letters Patent

The Schedule referred to in these Letters Patent, and making part of the same, containing a description in the words of the said Thomas Corbank himself of his improvement in the manufacture of tin plated lead pipes for stills worms and other purposes

---

Having run any requisite quantity of Lead into a flat rectangular mould, of convenient size, the moment the lead is all become solid — block or grain tin (in proportion to the thickness of the required plating) is immediately run upon the surface of the lead, which instantly unites with it, and becomes one solid mass; when it is passed through rollers till brought as thin as required, after which it is cut into proper sizes, and made into pipe in the usual way.
